The replacement cycle has started so claim your market share with NAPA Belts/Hose Heavy Duty Diesel Exhaust Fluid (DEF) Hotline™ SCR Hose Assemblies

Superior Design. Superior Performance.

Exclusive NAPA Belts/Hose innovations make Hotline SCR Hose Assemblies the preferred solution for SCR system maintenance.

- Patent-pending carbon fiber heating system provides faster thaw times, lower amp draw and more uniform heating than OE heated-wire designs. In cold weather, vehicles are up and running sooner, conserving fuel and improving efficiency.
- Dense, closed-cell EPDM cover resists cuts and abrasion better than typical OE replacements, for longer life in harsh environments.
- Over-molded quick connects keep dirt and grime out of critical connections to prevent premature system failure.
- 170 psi (11.7 bar) up to 200 psi (13.8 bar) maximum working pressure. Temperature range -40°F (-40°C) up to +257°F (-40°C to +125°C).
- 12V or 24V power.
- Heating and electrical connection per OE specifications.

Used by over 348,000 class 8 vehicles equipped with SCR systems

Selective Catalytic Reduction (SCR) System

- SCR technology uses ammonia to break down nitrogen oxide (NOx) emissions.
- Ammonia is introduced through Diesel Exhaust Fluid (DEF), which is injected into the exhaust stream.
- Specially manufactured hoses are employed to move DEF fluid throughout the system.
- DEF freezes at +12°F (-11°C). DEF hoses and couplings are electronically heated to prevent freezing.

### Diesel Exhaust Fluid (DEF) Products from NAPA Belts/Hose

**Gold Stripe® Heater Hose**
Premium heater hose used for supply and return in SCR systems.

**Diesel Exhaust Fluid Hotline SCR Hose Assemblies**
Superior design and performance for aftermarket replacement assemblies.

For more information about DEF Hose products, please contact your NAPA Heating/Cooling or Heavy Duty Sales Representative.
