

**Our SP Compressors  
are Ahead of the Game.**

### SMART OE ENGINEERING

At Delphi, to say “we work as a team” is an understatement. Take our aftermarket SP compressors for example. When developing aftermarket SP compressors, our engineers went to the source for OE technology. **Our OE engineers.**

Utilizing their worldwide OEM expertise, we converted their OE solution into an innovative alternative and applied it to the aftermarket. Delphi SP compressors are designed to fit a wider range of late model vehicles — including:

- Toyota Camry
- Honda Accord
- Chrysler minivans
- GM pickup trucks and sport utility vehicles

### SMARTER PART

We took our SP compressors used by major OEMs around the world and engineered them to fit other late model applications. You now have a new alternative with the same Delphi OE quality and performance you expect. Bottom line, use Delphi SP compressors on even more vehicles.

After all, aftermarket shouldn't mean after *thought*. While some competitors waste time trying to reproduce OE technologies for the aftermarket, Delphi OE-designed SP compressors are on the shelf and ready for installation.

### MORE APPLICATIONS

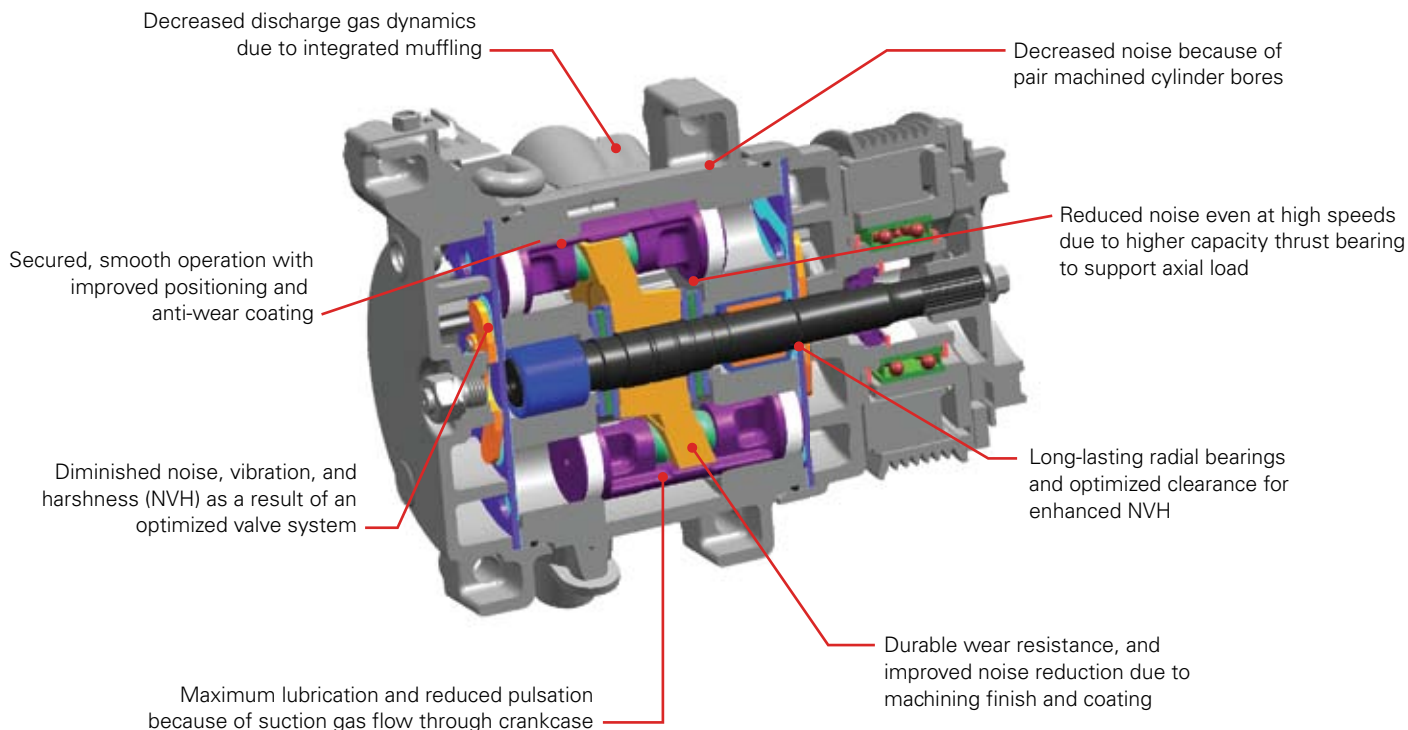

Our intelligent SKU management provides wider coverage with less SKUs. Not only do you receive Delphi quality, an OE alternative solution developed from OE technology, but less inventory to stock!

**Ahead of the Game?  
You Bet!**

**REDUCED NOISE. GREATER DURABILITY. IMPROVED PERFORMANCE.**

**THE BENEFIT OF OE?**

Two words. *Technology enhancements.* Delphi SP compressors' intelligent design and use of die-cast cylinders provides size and weight reduction for improved fuel economy. They deliver maximized performance due to a durable, lightweight, 10-cylinder axial piston design.

But our engineers didn't stop there. They tested the SP compressors for OE-specified durability and performance to 100,000 miles and conducted nearly 30 final assembly quality checks prior to packaging.

You have access to a complete, cost-effective OE repair in the box with availability in popular domestic and import applications.
